

## Hopscotch

Hopscotch is a popular game among the kids of Romania. It's a simple game in which you have a rock and a figure that is separated in squares where you have to jump on one foot.

The game goes like this: one of the kids playing is going to throw the rock so it lands on the square number one. After that, it has to jump over the square the rock has landed on and continue jumping on one foot to the next squares till it completes the figure.

When the child jumps his way back he needs to pick the stone up so he can complete the game.

The game goes on till the first player falls throwing the stone on the selected square or fails at jumping and so it comes the other kid's turn.

The first that completes the hopscotch wins.
